GOV.UK API for Content Team - Doing • Public

... Show Menu

Next up

- About this board
- Research common approaches to versioning a HTTP API (timebox 1 day)
- Review root fields in current Content API (excluding dates)
- (5) Store a diff of an edition in the action when it changes
- (3) Manuals relocator task issue - URL has incorrect slug and needs updating
- (3) Understand why we can't withdraw manual and write up card if not already in backlog
- Spike: How can we make the Publishing API dates simpler and less magical

Ready [5]

- (?) Research what makes a good/bad HTTP/REST API and what are good examples of HTTP/REST APIs (timebox 1 day)
- (8) Research how have we documented public GDS APIs
- Set up a WIP documentation for Content API
- (5) Deprecate the usage of update_type in publish for Publishing API and update usage across GOV.UK
- Agree how we want to approach mission documentation

Blocked [0]

Doing [5]

- Help Content Tools get content out of Publishing API faster (more get content woes) (3)
- Improve performance of the Expanded Link Set endpoint (3)
- Run E2E tests as part of Content Store and Travel Advice Publisher builds (1)

Technical Review [2]

- Notify downstream services (search indexing) when documents are unpublished (3)
- Filter access limited data when syncing from production to integration

How we use Trello on the GOV.UK Publishing Platform team

Alan Wright, 13 March 2017 — [Best practice](#), [How we work](#)

Teams at GDS are free to pick the processes and tools that work for them. On the GOV.UK Publishing Platform, our Kanban process is supported by [Trello](#). This is a follow-up to my blog post on [How we use Kanban on the GOV.UK Publishing Platform team](#), and explains how we use Trello to support our Kanban process.

What is Trello?

Read the GOV.UK [vision](#) and 2017 to 2018 goals and the [GOV.UK](#) 

Inside GOV.UK

A blog about running and improving the GOV.UK website, for people who create or manage content on the site, frequent users and anyone else who is interested. Written by the GOV.UK team.

Property news

UK's dysfunctional housing market to get £2.3 billion boost

A new Housing Infrastructure Fund, which will lay the groundwork for 100,000 much-needed new homes in England, has been announced by the Government.

Financially savvy millennials face heavy mortgage burden

A quarter of millennial homeowners remortgage to secure a better deal. But this still leaves them with a mountain of debt compared to older generations, says new research.

UK rents continue their downward slide

What is the current state of the rental market in the UK? Zoopla looks at the latest reports, which show it's something of a mixed bag for tenants and landlords.

Send it to Trello

A screenshot of a web browser window titled "Developer API Keys". The URL in the address bar is "https://trello.com/app-key". The page content includes a "Home" button, a "Go to Your Boards →" button, and a large heading "Developer API Keys". Below the heading, there is a "Key:" label followed by a long, grayed-out text input field. Underneath, there is a "Token:" label and a descriptive paragraph: "Most developers will need to ask each user to [authorize](#) your application. If you are looking to build an application for yourself, or are doing local testing, you can manually generate a [Token](#)." At the bottom, there is a link "API Documentation".
